American Society for Photobiology

The American Society for Photobiology (ASP) is a non-profit organization dedicated to promoting the interests of photobiological sciences, disseminating information about the biological, medical, and environmental implications of light-mediated processes, and facilitating interactions among different subdisciplines in the field. The ASP was founded in 1972 and currently represents more than 1400 members in the USA and abroad interested in the myriad biological effects of ultraviolet and visible radiation and in the use of light to study biosystems. The Society has five divisions: Photochemistry/Photophysics/Phototechnology; Photomedicine; Photosensory Biology; Photosynthesis/Photoconversion; and Environmental Photobiology/UVR Effects.

The ASP publishes (i) *Photochemistry and Photobiology*, a monthly international journal containing peer-reviewed research papers and review articles; (ii) *ASP Today*, a bi-monthly newsletter containing meeting announcements, job opportunities, and other items of current interest; (iii) a Membership Directory. ASP members receive complementary copies of these publications.

A four-day Annual Meeting is typically held in June and consists of symposia, special lectures, workshops, contributed paper sessions and poster sessions on a full range of topics in photobiology. The 1997 Annual Meeting will be held in St. Louis, MO (July 5–10). The ASP is a co-sponsor with the European Society for Photobiology of Photobiology Online (http://www.kumc.edu/POL) a World Wide Web site, which lists useful information such as educational opportunities, job openings, and the Table of Contents of *Photochemistry and Photobiology*.

Individuals interested in any aspect of photobiology are invited to become members of the ASP. Scientists-in-training in photobiological fields are encouraged to join as Associate Members. Associate members pay lower dues, but receive all of the Society publications and may compete for travel awards to the Annual Meeting. Sponsoring memberships are also available at two levels, Sustaining and Benefactor, to organizations with particular interests in photobiology. Inquiries relating to membership and ASP activities can be directed to: American Society for Photobiology, BioTech Park, 1021 15th Street, Suite 9, Augusta, GA 30901-3158, Phone: 706-722-7511, Fax: 706-722-7515, e-mail: maps@csra.net

Department _____

Institution _____

Address _____

City _____ State/Country _____ Zip _____

Phone _____ Fax _____ E-mail _____

Highest Degree: _____ Discipline (Chemistry, Physics, Pediatrics, etc.) _____

Indicate your subspecialty division by a "1" in the box next to your first choice and a "2" next to your second.

☐ Photochemistry, Photophysics and Phototechnology
☐ Photomedicine
☐ Photosensory Biology
☐ Environmental Photobiology and UVR Effects
☐ Photosynthesis and Photoconversion

Type of Membership

☐ FULL MEMBER. Dues of (US) $65 include a subscription to *Photochemistry and Photobiology*.

☐ ASSOCIATE MEMBER. Dues of (US) $25 include a subscription to *Photochemistry and Photobiology*. Predoctoral or Postdoctoral status must be verified by advisor's signature.

Advisor's Signature: _____ Date: _____

Application for membership must be signed by *two* members (not Associate) of the Society.

1. _____ Print: _____

2. _____ Print: _____

Include a check payable to the American Society for Photobiology or information below to pay by Visa or Mastercard. Membership is for the calendar year.

Applicant's Signature: _____ Date: _____

Credit Card Information: ☐ VISA ☐ MASTERCARD

Card Number _____ Expiration Date _____

Card holder's signature _____

SYMPOSIUM-IN-PRINT

Iron-sulfur–type reaction centers

Guest Editor: John M. Olson

1 Iron-sulfur–type reaction centers. Introduction
John M. Olson

5 Function of the reaction center of green sulfur bacteria
Hidehiro Sakurai, Noriaki Kusumoto and Kazuhito Inoue

14 P840-reaction centers from *Chlorobium tepidum*—quinone analysis and functional reconstitution into lipid vesicles
Nicole Frankenberg, Christine Hager-Braun, Ute Feiler, Markus Fuhrmann, Hans Rogl, Nikolaus Schneebauer, Nathan Nelson and Günter Hauska

20 ^{14}N electron spin echo envelope modulation (ESEEM) spectroscopy of the cation radical $P840^{+\cdot}$, the primary electron donor of the *Chlorobium limicola* reaction center
Peter J. Bratt, Irine P. Muhiuddin, Michael C. W. Evans and Peter Heathcote

26 Excited states and charge separation in membranes of the green sulfur bacterium *Prosthecochloris aestuarii*
Hans Kramer, Thijs J. Aartsma and Jan Amesz

32 Temperature dependence of charge recombination in *Heliobacillus mobilis*
Hung-Cheng Chiou and Robert E. Blankenship

38 Pigment–protein interactions in the antenna–reaction center complex of *Heliobacillus mobilis*
Ursula Liebl, Wolfgang Nitschke and Tony A. Mattioli

46 Site-directed mutagenesis and analysis of second-site revertants indicates a requirement for C-terminal amino acids of PsaB for stable assembly of the photosystem I reaction center complex in *Chlamydomonas reinhardtii*
Hyeonmoo Lee, Scott E. Bingham and Andrew N. Webber

53 Characterization of *psaI* and *psaL* mutants of *Synechococcus* sp. strain PCC 7002: a new model for state transitions in cyanobacteria
Wendy M. Schluchter, Gaozhong Shen, Jindong Zhao and Donald A. Bryant

PHOTOCHEMISTRY, PHOTOPHYSICS AND PHOTOTECHNOLOGY

67 Photophysical properties of some methyl-substituted angelicins: fluorometric and flash photolytic studies
F. Elisei, G. G. Aloisi, C. Lattarini, L. Latterini, F. Dall'Acqua and A. Guiotto

75 Thymidine–psoralen photoaddition: stereoselective formation of a *trans-syn* pyrone adduct
Jean-Luc Décout, Amine Guendouz and Jean Lhomme

80 Photochemistry of tetracene adsorbed on dry silica: products and mechanism
Reza Dabestani, Mark Nelson and Michael E. Sigman

87 Picosecond fluorescence of merocyanines derived from photochromic spironaphthoxazines
Sandra Monti, Vincenzo Malatesta, Pietro Bortolus and Douglas Magde

92 Study of photoinduced energy and electron transfer in α-terthienyl–bovine serum albumin conjugates: a laser flash photolysis study
R. Boch, N. Mohtat, Y. Lear, J. T. Arnason, T. Durst, J. C. Scaiano

100 Preservation of immunoreactivity in the photolabeling of the B72.3 human antibody
Raghoottama S. Pandurangi, Srinivasa R. Karra, Robert R. Kuntz and Wynn A. Volkert

ENVIRONMENTAL PHOTOBIOLOGY AND UVR EFFECTS

106 Photoinactivation of superoxide synthases of the plasma membrane from rose (*Rosa damascena* Mill.) cells
Terence M. Murphy and Han Vu

110 The influence of photosynthetically active radiation on the effects of ultraviolet-B radiation on *Arabidopsis thaliana*
Edward J. Berkelaar, Douglas P. Ormrod and Beverley A. Hale

117 8-Oxodeoxyguanosine formation in the DNA of cultured cells after exposure to H_2O_2 alone or with UVB or UVA irradiation
J. E. Rosen, A. K. Prahalad and G. M. Williams

123 The use of UV radiation to control the architecture of *Salvia splendens* plants. I. Effects on plant growth, water relations and gas exchange
A. Giannini, A. Pardossi and B. Lercari

131 The use of UV radiation to control the architecture of *Salvia splendens* plants. II. Relationships between PAR levels and UV radiation in the photoregulation of stem elongation
Lise Bertram and Bartolomeo Lercari

137 Role of hydrogen peroxide in the cytotoxic effects of UVA/B radiation on mammalian cells
Chad J. Bertling, Fubao Lin and Albert W. Girotti

143 Plant canopy shape and the influences on UV exposures to the canopy
A. V. Parisi and J. C. F. Wong

149 Mycosporine-like amino acids provide protection against ultraviolet radiation in eggs of the green sea urchin *Strongylocentrotus droebachiensis*
Nikki L. Adams and J. Malcolm Shick

PHOTOMEDICINE

159 Kinetic transport analysis of daunorubicin by LoVo and LoVo/DX cells
A. Andreoni, A. Colasanti, P. Colasanti, A. Kisslinger, M. Mastrocinque, P. Riccio and G. Roberti

163 Damage threshold of normal rat brain in photodynamic therapy
Q. Chen, M. Chopp, L. Madigan, M. O. Dereski and F. W. Hetzel

168 Hypericin-induced phototoxicity in cultured fibroblasts and swine erythrocytes
Hai Yu, Suzanne T. Wolford, Redempta Kegode, Wei Zhao and Gary D. Osweiler

174 Serine conjugates of chlorophyll and bacteriochlorophyll: photocytotoxicity *in vitro* and tissue distribution in mice bearing melanoma tumors
V. Rosenbach-Belkin, L. Chen, L. Fiedor, I. Tregub, F. Pavlotsky, V. Brumfeld, Y. Salomon and A. Scherz

182 Apoptosis or necrosis following Photofrin® photosensitization: influence of the incubation protocol
M. Dellinger

188 Sunscreens protect from UV-promoted squamous cell carcinoma in mice chronically irradiated with doses of UV radiation insufficient to cause edema
Rosa Bestak and Gary M. Halliday

194 Alkyl ether analogs of chlorophyll-*a* derivatives: Part 1. Synthesis, photophysical properties and photodynamic efficacy
Ravindra K. Pandey, Adam B. Sumlin, Scott Constantine, Mohamed Aoudia, William R. Potter, David A. Bellnier, Barbara W. Henderson, Michael A. Rodgers, Kevin M. Smith and Thomas J. Dougherty

205 Effect of glucose on photodynamic action of methylene blue in *Escherichia coli* cells
Márcia Capella, Ana Maria Coelho and Salatiel Menezes

211 Role of calcium in photodynamically induced cell damage of human fibroblasts
Alexander Hubmer, Anton Hermann, Karl Überriegler and Barbara Krammer

216 Photochemistry and photobiology of imidazole-4(5)-methylidene malonic acid: an analog of both E- and Z-urocanic acid
Melissa A. Houghtaling, Matthew A. Kennedy, Taj Mohammad, Irwin Tessman and Harry Morrison

220 Phospholipases induce melanogenesis in organ-cultured skin
Kazuhisa Maeda, Yasushi Tomita, Masako Naganuma and Hachiro Tagami

224 Protective effect of magnesium-L-ascorbyl-2 phosphate against skin damage induced by UVB irradiation
Shizuko Kobayashi, Makoto Takehana, Shinobu Itoh and Eiichi Ogata

229 Book Review

SYMPOSIUM-IN-PRINT

Effects of UV on HIV and other infections

Guest Editors: Janusz Z. Beer and Barbara Z. Zmudzka

231 Effects of UV on HIV and other infections Introduction
Janusz Z. Beer and Barbara Z. Zmudzka

234 Is phototherapy safe for HIV-infected individuals?
Melanie L. Adams, Karen R. Houpt and Ponciano D. Cruz, Jr.

238 Effect of low-dose gamma radiation on HIV replication in human peripheral blood mononuclear cells
Y. Xu, B. Conway, J. S. G. Montaner, M. V. O'Shaughnessy and C. L. Greenstock

242 UV radiation and mouse models of herpes simplex virus infection
Mary Norval and Ali A. El-Ghorr

246 Medical UV exposures and HIV activation
Barbara Z. Zmudzka, Sharon A. Miller, Mary E. Jacobs and Janusz Z. Beer

254 Does exposure to UV radiation induce a shift to a Th-2-like immune reaction?
Stephen E. Ullrich

259 Mechanism of UVB-induced suppression of the immune response to *Mycobacterium bovis* bacillus Calmette-Guerin: role of cytokines on macrophage function
Amminikutty Jeevan, Stephen E. Ullrich, Maria De Gracia, Rupa Shah and Yan Sun

267 PUVA therapy is preferable to UVB phototherapy in the management of HIV-associated dermatoses
Warwick L. Morison

269 Risk assessment of UVB effects on resistance to infectious diseases
Johan Garssen, Wim Goettsch, Frank de Gruijl, Wout Slob and Henk Van Loveren

275 The skin immune system in the course of HIV-1 infection
Michael Henry and Erwin Tschachler

280 Signal transduction and HIV transcriptional activation after exposure to ultraviolet light and other DNA-damaging agents
Kristoffer Valerie, William S. Laster, Luhua Cheng, Jean C. Kirkham, Peter Reavey and Nancy B. Kuemmerle

PHOTOCHEMISTRY, PHOTOPHYSICS AND PHOTOTECHNOLOGY

286 The origin of magnetic field dependent recombination in alkylcobalamin radical pairs
Ettaya N. Natarajan and Charles B. Grissom

296 Fluorescence quenching of 1-pyrenemethanol by methylviologen in polystyrene latex dispersions
Kenichi Nakashima and Naofumi Kido

303 Evaluation of an economical sunlamp, that emits a near solar UV power spectrum for conducting photoimmunological and sunscreen immune protection studies
Donathan G. Beasley, John Beard, Joseph W. Stanfield and Lee K. Roberts

310 Quantitative determination of cyclobutane thymine dimers in DNA by stable isotope-dilution mass spectrometry
Ian D. Podmore, Marcus S. Cooke, Karl E. Herbert and Joseph Lunec

316 Log-normal description of fluorescence spectra of organic fluorophores
Edward A. Burstein and Victor I. Emelyanenko

ENVIRONMENTAL PHOTOBIOLOGY AND UVR EFFECTS

321 UVB shielding role of $FeCl_3$ and certain cyanobacterial pigments
Ashok Kumar, M. B. Tyagi, Ganna Srinivas, Nilima Singh, Har D. Kumar, Rajeshwar P. Sinha and Donat-P. Häder

326 A method for evaluation of UV and biologically effective exposures to plants
A. V. Parisi, J. C. F. Wong and V. Galea

334 Lethal effect induced in *Pseudomonas aeruginosa* exposed to ultraviolet-A radiation
Rubén O. Fernández and Ramón A. Pizarro

340 Detector-based calibration method for high-accuracy solar UV measurements
Petri Kärhä, Reijo Visuri, Kirsti Leszczynski, Farshid Manoochehri, Kari Jokela and Erkki Ikonen

344 Effect of the UV modification of α-crystallin on its ability to suppress nonspecific aggregation
Aziza R. Ellozy, Patricia Ceger, Ren H. Wang and James Dillon

349 Formation of cyclobutane thymine dimers from UVA photosensitization of pyridopsoralen monoadducted DNA
Lidia Andreu Guillo, Bénédicte Beylot, Paul Vigny and Annick Spassky

PHOTOSYNTHESIS AND PHOTOCONVERSION

356 Circular and linear dichroism of aggregates of chlorophyll *a* and chlorophyll *b* in 3-methylpentane and paraffin oil
J. A. I. Oksanen, V. M. Helenius, P. H. Hynninen, H. van Amerongen, J. E. I. Korppi-Tommola and R. van Grondelle

363 Characterization of carotenoid triplet states in the light-harvesting complex B800-850 from the purple bacterium *Rubrivivax gelatinosus*
Vladimira Jirsakova, Françoise Reiss-Husson, Bas Van Dijk, Gabrielle Owen and Arnold J. Hoff

PHOTOMEDICINE

369 8-methoxypsoralen and ultraviolet A radiation activate the human elastin promoter in transgenic mice: *in vivo* and *in vitro* evidence for gene induction
Eric F. Bernstein, Francis P. Gasparro, Douglas B. Brown, Tsunemichi Takeuchi, Sung K. Kong and Jouni Uitto

375 Photodynamic effects of hypericin on lipid peroxidation and antioxidant status in melanoma cells
Christophe Hadjur, Marie-Jeanne Richard, Marie-Odile Parat, Pierre Jardon and Alain Favier

382 Spectroscopic and biological testing of photobleaching of porphyrins in solutions
L. Bezdetnaya, N. Zeghari, I. Belitchenko, M. Barberi-Heyob, J.-L. Merlin, A. Potapenko and F. Guillemin

PHOTOSENSORY BIOLOGY

387 Action spectra for photoinhibition of sexual development in *Phycomyces blakesleeanus*
Y. Yamazaki, H. Kataoka, A. Miyazaki, M. Watanabe and T. Ootaki

RAPID COMMUNICATION

393 Indication for the occurrence of nitric oxide synthases in fungi and plants and the involvement in photoconidiation of *Neurospora crassa*
Helga Ninnemann and Josef Maier

BOOK REVIEW

399 Infrared Spectroscopy of Biological Molecules. Edited by Henry H. Mantsch and Dennis Chapman
Reviewed by David F. Bocian

SYMPOSIUM-IN-PRINT

Environmental Ultraviolet Photobiology

Guest Editors: Thomas P. Coohill, Donat-P. Häder and David L. Mitchell

401 Environmental Ultraviolet Photobiology Introduction
Thomas P. Coohill, Donat-P. Häder and David L. Mitchell

403 Quantifying light and ultraviolet radiation in plant biology
Lars Olof Björn and Thomas C. Vogelmann

407 Spectral modeling of UV inhibition of *in situ* Antarctic primary production using a field-derived biological weighting function
Nicolas P. Boucher and Barbara B. Prézelin

419 Ambient solar radiation-induced photodamage in marine bacterioplankton
Wade H. Jeffrey, Peter Aas, M. Maille Lyons, Richard B. Coffin, Ralph J. Pledger and David L. Mitchell

428 Photoinhibition in the Mediterranean green alga *Halimeda tuna* Ellis et Sol measured *in situ*
Donat-P. Häder, Markus Porst, Heike Herrmann, Jochen Schäfer and Regas Santas

435 Effects of solar UV radiation on diatom assemblages of the Mediterranean
Regas Santas, Donat-P. Häder and Charalambia Lianou

440 Nonmammalian models for sunlight carcinogenesis: genetic analysis of melanoma formation in *Xiphophorus* hybrid fish
Rodney S. Nairn, Donald C. Morizot, Steven Kazianis, Avril D. Woodhead and Richard B. Setlow

449 Developmental responses of amphibians to solar and artificial UVB sources: a comparative study
John B. Hays, Andrew R. Blaustein, Joseph M. Kiesecker, Peter D. Hoffman, Iovanna Pandelova, Daniel Coyle and Timothy Richardson

457 Effects of solar UVB radiation on growth, flowering and yield of central and southern European maize cultivars (*Zea mays* L.)
U. Mark, M. Saile-Mark and M. Tevini

464 Plant responses to changing environmental stress: cyclobutyl pyrimidine dimer repair in soybean leaves
Betsy M. Sutherland, Shinnosuke Takayanagi, Joe H. Sullivan and John C. Sutherland

INVITED REVIEW

469 Structure and biodistribution relationships of photodynamic sensitizers
Ross W. Boyle and David Dolphin

PHOTOCHEMISTRY, PHOTOPHYSICS AND PHOTOTECHNOLOGY

486 Spectroscopic study of new fluorescent probes
M. I. Sández, A. Suárez, M. A. Ríos, M. C. Balo, F. Fernández and Carmen López

492 Hydrogen atoms are produced when tryptophan within a protein is irradiated with ultraviolet light
Paul J. Angiolillo and Jane M. Vanderkooi

496 Photosensitization by norfloxacin is a function of pH
P. Bilski, L. J. Martinez, E. B. Koker and C. F. Chignell

501 Photoionization of indole, *N*-methylindole and tryptophan in aqueous solution upon excitation at 193 nm
W. Grant McGimpsey and Helmut Görner

510 Photochemically induced solid-state degradation, condensation, and rearrangement reactions in lignin model compounds and milled wood lignin
Dimitris S. Argyropoulos and Yujun Sun

518 The mechanism of photochemical release of nitric oxide from *S*-nitrosoglutathione
Paul D. Wood, Bulent Mutus and Robert W. Redmond

525 Photophysical properties of pyrazinopsoralen, a new monofunctional psoralen
Gyu Seok Han, Dong Jin Yoo, Sung Ki Kim, Sang Chul Shim and Ho Kwon Kang

531 Hydrogen-bonding interactions between harmane and pyridine in the ground and lowest excited singlet states
Manuel Balón, María A. Muñoz, Pilar Guardado and Carmen Carmona

ENVIRONMENTAL PHOTOBIOLOGY AND UVR EFFECTS

537 Role of enterobactin and intracellular iron in cell lethality during near-UV irradiation in *Escherichia coli*

J. Hoerter, A. Pierce, C. Troupe, J. Epperson and A. Eisenstark

542 Damage to UV-sensitive cells by short UV in photographic flashes

S. Menezes and C. Monteiro

547 Causes of cell death following ultraviolet B and C exposures and the role of carotenes

Enrique Cerdá-Olmedo, Virginia Martín-Rojas and Beatriz Cubero

PHOTOSYNTHESIS AND PHOTOCONVERSION

552 Comparative time-resolved photosystem II chlorophyll *a* fluorescence analyses reveal distinctive differences between photoinhibitory reaction center damage and xanthophyll cycle-dependent energy dissipation

Adam M. Gilmore, Theodore L. Hazlett, Peter G. Debrunner and Govindjee

564 Structure-based calculations of the optical spectra of the LH2 bacteriochlorophyll–protein complex from *Rhodopseudomonas acidophila*

Kenneth Sauer, Richard J. Cogdell, Steve M. Prince, Andy Freer, Neil W. Isaacs and Hugo Scheer

PHOTOMEDICINE

577 An animal model for human melanoma

Adele Green, Rachel Neale, Roger Kelly, Ian Smith, Effie Ablett, Barry Meyers and Peter Parsons

581 UVB–induced decreased resistance to *Trichinella spiralis* in the rat is related to impaired cellular immunity

W. Goettsch, J. Garssen, F. R. De Gruijl and H. Van Loveren

586 Synergistic interaction of photodynamic treatment with the sensitizer aluminum phthalocyanine and hyperthermia on loss of clonogenicity of CHO cells

Monique H. Rasch, Karmi Tijssen, John VanSteveninck and Tom M. A. R. Dubbelman

594 The immunological effect of 8-methoxypsoralen and UVA treatment on murine T-cell leukemia

Ting-Ying Cheng, Fung-Win Shen and Rong-Hwa Lin

601 Delayed oxidative photodamage induced by photodynamic therapy

David Kessel and Yu Luo

PHOTOSENSORY BIOLOGY

605 Light reflected from colored mulches to growing turnip leaves affects glucosinolate and sugar contents of edible roots

George F. Antonious, Michael J. Kasperbauer and Matthew E. Byers

ERRATUM

611 8-Oxodeoxyguanosine formation in the DNA of cultured cells after exposure to H_2O_2 alone or with UVB or UVA irradiation

J. E. Rosen, A. K. Prahalad and G. M. Williams

Photochemistry and Photobiology

The official journal of the American Society for Photobiology • Volume 64 • No. 4 • October 1996

INVITED REVIEW

613 Retinoids and the visual process
Rosalie K. Crouch, Gerald J. Chader, Barbara Wiggert and David R. Pepperberg

PHOTOCHEMISTRY, PHOTOPHYSICS AND PHOTOTECHNOLOGY

622 Photochemical and photophysical studies of 3-amino-6-iodoacridine and the inactivation of λ phage
Tongqian Chen, Eric Voelk, Matthew S. Platz and Raymond P. Goodrich

632 Two-color two-photon excitation of fluorescence
Joseph R. Lakowicz, Ignacy Gryczynski, Henryk Malak and Zygmunt Gryczynski

636 On the possibility of evanescent wave excitation distal from a solid–liquid interface using light quenching
Joseph R. Lakowicz, Zygmunt Gryczynski and Ignacy Gryczynski

ENVIRONMENTAL PHOTOBIOLOGY AND UVR EFFECTS

642 Comparison of Green and Lowtran radiation schemes with a discrete ordinate method UV model
P. Weihs and A. R. Webb

649 Ultraviolet B wavelength dependence for the regulation of two major matrix-metalloproteinases and their inhibitor TIMP-1 in human dermal fibroblasts
Peter Brenneisen, Jinsook Oh, Meinhard Wlaschek, Jutta Wenk, Karlis Briviba, Christina Hommel, Gernot Herrmann, Helmut Sies and Karin Scharffetter-Kochanek

658 Alternation in photosynthetic characteristics of *Anabaena doliolum* following exposure to UVB and Pb
L. C. Rai, Bipul Tyagi and Nirupama Mallick

PHOTOSYNTHESIS AND PHOTOCONVERSION

664 Effect of supplementary UVB radiation on chlorophyll synthesis and accumulation of photosystems during chloroplast development in *Spirodela oligorrhiza*
Christopher A. Marwood and Bruce M. Greenberg

PHOTOMEDICINE

671 Photodynamic therapy with a diode laser for implanted fibrosarcoma in mice employing mono-L-aspartyl chlorin e_6
Toichiro A. Katsumi, Katsuo Aizawa, Yukari Kuroiwa, Kouichi Saito, Yasushi Kurata, Yoshiteru Ii, Tetsuya Okunaka, Chimori Konaka and Harubumi Kato

676 Detection of early stages of carcinogenesis in adenomas of murine lung by 5-aminolevulinic acid–induced protoporphyrin IX fluorescence
D. L. Campbell, E. F. Gudgin-Dickson, P. G. Forkert, R. H. Pottier and J. C. Kennedy

683 Inactivation of photosensitizing merocyanine dyes by plasma, serum and serum components
Gregory S. Anderson, Wolfgang H. H. Günther, Roger Searle, James M. Bilitz, Marianne Krieg and Fritz Sieber

688 Mexoryl® SX protects against solar-simulated UVR-induced photocarcinogenesis in mice
Anny Fourtanier

694 Unsymmetrically substituted benzonaphthoporphyrazines: a new class of cationic photosensitizers for the photodynamic therapy of cancer
U. Michelsen, H. Kliesch, G. Schnurpfeil, A. K. Sobbi and D. Wöhrle

702 Measurement of tumor vascular damage in mice with ^{99m}Tc-MIBI following photodynamic therapy
Nicole Brasseur, Karina Lewis, Jacques Rousseau and Johan E. van Lier

707 Photodynamic therapy of human glioma (U87) in the nude rat
Michael Chopp, Lara Madigan, Mary Dereski, Feng Jiang and Yi Li

712 Photophysical and redox properties of a series of phthalocyanines: relation with their photodynamic activities on *TF-1* and Daudi leukemic cells
Jean-Pierre Daziano, Steen Steenken, Christian Chabannon, Patrice Mannoni, Michel Chanon and Michel Julliard

720 Cervical precancer detection using a multivariate statistical algorithm based on laser-induced fluorescence spectra at multiple excitation wavelengths

Nirmala Ramanujam, Michele Follen Mitchell, Anita Mahadevan-Jansen, Sharon L. Thomsen, Gregg Staerkel, Anais Malpica, Thomas Wright, Neely Atkinson, and Rebecca Richards-Kortum

ERRATUM

736 Photophysical property of sanguinarine in the excited singlet state. *Photochem Photobiol* (1992) **56**(3) 311–317

A. Das, R. Nandi, M. Maiti

Photochemistry and Photobiology

The official journal of the American Society for Photobiology • Volume 64 • No. 5 • November 1996

SYMPOSIUM-IN-PRINT

New Applications in Photodynamic Therapy

Guest Editors: Julia G. Levy and Modestus Obochi

737 New applications in photodynamic therapy: Introduction
Julia G. Levy and Modestus Obochi

740 Photodynamic treatment of rheumatoid and inflammatory arthritis
Kenneth B. Trauner and Tayyaba Hasan

751 Transcutaneous photodynamic therapy alters the development of an adoptively transferred form of murine experimental autoimmune encephalomyelitis
Simon Leong, Agnes H. Chan, Julia G. Levy and David W. C. Hunt

758 Local photodynamic therapy reduces tissue hyperplasia in an experimental restenosis model
Peter Gonschior, Florian Gerheuser, Michael Fleuchaus, Tanya Y. Huehns, Alwin E. Goetz, Ulrich Welsch, Ronald Sroka, Marc Dellian, Hans A. Lehr and Berthold Höfling

PHOTOCHEMISTRY, PHOTOPHYSICS AND PHOTOTECHNOLOGY

764 Model studies of DNA photorepair: enthalpy of cleavage of a pyrimidine dimer measured by photothermal beam deflection calorimetry
Michael P. Scannell, Syun-Ru Yeh and Daniel E. Falvey

769 The reaction of triplet 2-methyl-1,4-naphthoquinone (menadione) with DNA and polynucleotides
T. Melvin, E. Bothe and D. Schulte-Frohlinde

777 A photophysical study of purines and theophylline by using laser-induced optoacoustic spectroscopy
Daniel H. Murgida, Gabriel M. Bilmes and Rosa Erra-Balsells

785 Fluorescence study of the conformational properties of recombinant tick anticoagulant peptide (*Ornithodorus moubata*) using multifrequency phase fluorometry
Alain Sillen, Rita Vos and Yves Engelborghs

ENVIRONMENTAL PHOTOBIOLOGY AND UVR EFFECTS

792 All-weather comparison between spectral and broadband (Robertson–Berger) UV measurements
Bernhard Mayer and Gunther Seckmeyer

800 Use of uracil thin layer for measuring biologically effective UV dose
Pál Gróf, Sándor Gáspár and Györgyi Rontó

807 UVB irradiation upregulation of the *Drosophila* 1731 retrotransposon LTR requires the same short sequence of U3 region in a human epithelial cell line as in *Drosophila* cells
E. Faure, M. Best-Belpomme and S. Champion

814 Significant reduction of UVB caused by smoke from biomass burning in Brazil
Forrest M. Mims III

PHOTOSYNTHESIS AND PHOTOCONVERSION

817 Confocal fluorescence lifetime imaging of chlorophyll molecules in polymer matrices
R. Sanders, M. A. M. J. van Zandvoort, A. Draaijer, Y. K. Levine and H. C. Gerritsen

821 Separation, identification and determination of luciferin in the Iranian firefly, *Lampyris turkestanicus* by HPLC and spectroscopic methods
M. R. Hadj-Mohammadi and M. J. Chaichi

823 Triplet state energy transfer between the primary donor and the carotenoid in *Rhodobacter sphaeroides* R-26.1 reaction centers exchanged with modified bacteriochlorophyll pigments and reconstituted with spheroidene
Harry A. Frank, Veeradej Chynwat, Anthony Posteraro, Gerhard Hartwich, Ingrid Simonin and Hugo Scheer

PHOTOMEDICINE

832 Likely mechanism of the hydrophobic sensitizer accumulation in tumor cells: mathematical models
N. V. Stepanova, L. V. Zhorina and E. B. Chernyaeva

838 Photohaptenic properties of fluoroquinolones
Yoshiki Tokura, Takafumi Nishijima, Hiroaki Yagi, Fukumi Furukawa and Masahiro Takigawa

845 The induction of partial resistance to photodynamic therapy by the protooncogene *BCL-2*
Jin He, Munna L. Agarwal, Hedy E. Larkin, Libby R. Friedman, Liang-yan Xue and Nancy L. Oleinick

853 Reduction of intracellular pH is not the mechanism for the synergistic interaction between photodynamic therapy and nigericin

Marie E. Varnes, Marian T. Bayne and Gary R. Bright

PHOTOSENSORY BIOLOGY

859 Action spectrum for sporulation and photoavoidance in the plasmodium of *Physarum polycephalum*, as modified differentially by temperature and starvation

Toshiyuki Nakagaki, Shoji Umemura, Yasutaka Kakiuchi and Tetsuo Ueda

863 Red light–induced appearance of phosphotyrosine-like epitopes on nuclear proteins from pea (*Pisum sativum* L.) plumules

Chii-Gong Tong, Richard E. Kendrick and Stanley J. Roux

867 An azulenic bacteriorhodopsin analog has photoinduced activity

Anna B. Druzhko, David J. Vanderah, Baldwin Robertson and Howard H. Weetall

870 A negative regulatory factor for the dark repression of *Arabidopsis thaliana cab*1 gene

Dong-Kug Choi, Hee-Jin Park and In-Soo Kim

ERRATA

876 Role of Fapy glycosylase and UvrABC excinuclease in the repair of UVA (320–400 nm)-mediated DNA damage in *Escherichia coli*

Michael G. Shennan, Claire M. Palmer and Herb E. Schellhorn

877 Ultraviolet B wavelength dependence for the regulation of two major matrix-metalloproteinases and their inhibitor TIMP-1 in human dermal fibroblasts

Peter Brenneisen, Jinsook Oh, Meinhard Wlaschek, Jutta Wenk, Karlis Briviba, Christina Hommel, Gernot Herrmann, Helmut Sies and Karin Scharffetter-Kochanek

Photochemistry and Photobiology

The official journal of the American Society for Photobiology • Volume 64 • No. 6 • 1996

INVITED REVIEWS

887 Photobiology and ecophysiology of rice field cyanobacteria
Rajeshwar P. Sinha and Donat-P. Häder

897 Light signal transduction in plants
Jeffrey M. Staub and Xing-Wang Deng

PHOTOCHEMISTRY, PHOTOPHYSICS AND PHOTOTECHNOLOGY

906 Fluorescent characteristics and pharmacokinetic profiles of the fluorescent probe BCECF in various tissues: the role of blood content
J. M. Devoisselle, S. Soulié, S. Mordon and H. Maillols

911 Effect of magnesium and calcium complexation on the photochemical properties of norfloxacin
Lydia Martínez, Piotr Bilski and Colin F. Chignell

918 EPR detection of free radicals in UV–irradiated skin: mouse *versus* human
Beth Anne Jurkiewicz and Garry R. Buettner

923 Photochemistry and photophysical properties of novel, unsymmetrically substituted metallophthalocyanines
David S. Lawrence and David G. Whitten

ENVIRONMENTAL PHOTOBIOLOGY AND UVR EFFECTS

936 The effects of the broadband UVA radiation on myeloid leukemia cells: the possible role of protein kinase C in mediation of UVA–induced effects
Dariusz Leszczynski, Susanna Fagerholm and Kirsti Leszczynski

943 Induction of cyclobutane pyrimidine dimer photolyase in cultured fish cells by UVA and blue light
Hiroshi Mitani, Nobuhiro Uchida and Akihiro Shima

949 Heat shock transcription factor, HSF, is activated by ultraviolet irradiation
Ken Ohnishi, Hideki Matsumoto, Akihisa Takahashi, Xinjiang Wang and Takeo Ohnishi

PHOTOSYNTHESIS AND PHOTOCONVERSION

953 Ultraweak luminescence generated by sweet potato and *Fusarium oxysporum* interactions associated with a defense response
Takahiro Makino, Kimihiko Kato, Hiroyuki Iyozumi, Hiroe Honzawa, Yoshiaki Tachiiri and Mitsuo Hiramatsu

PHOTOMEDICINE

957 *Saccharomyces cerevisiae* mutants defective in heme biosynthesis as a tool for studying the mechanism of phototoxicity of porphyrins
Teresa Żołądek, Nguyen Bich Nhi and Joanna Rytka

963 *In vivo* fluence rate effect in photodynamic therapy of early cancers with tetra(*m*-hydroxyphenyl)chlorin
Snezana Andrejevic Blant, Alain Woodtli, Georges Wagnières, Charlotte Fontolliet, Hubert van den Bergh and Philippe Monnier

969 Chronic low-dose UVA irradiation induces local suppression of contact hypersensitivity, Langerhans cell depletion and suppressor cell activation in C3H/HeJ mice
Rosa Bestak and Gary M. Halliday

975 Photophysics and intracellular distribution of a boronated porphyrin phototherapeutic agent
Paul G. Spizzirri, John S. Hill, Stephen B. Kahl and Kenneth P. Ghiggino

984 The effect of cold stress on UVB injury in mouse skin and cultured keratinocytes
Toshiaki Ota, Katsumi Hanada and Isao Hashimoto

988 Solar-simulated ultraviolet irradiation induces selective influx of $CD4^+$ T lymphocytes in normal human skin
Sergio Di Nuzzo, Menno A. de Rie, Chris M. van der Loos, Jan D. Bos and Marcel B. M. Teunissen

994 Prodrugs of 5-aminolevulinic acid for photodynamic therapy
Joris Kloek and Gerard M. J. Beijersbergen van Henegouwen

PHOTOSENSORY BIOLOGY

1001 Decarboxylation of indole-3-acetic acid and inhibition of growth in *Avena sativa* seedlings by plant-derived photosensitizers
Thomas M. Brennan
